### PROFILE

A dynamic full-stack Web Developer with a demonstrated capacity to excel in both independent and team-driven work environments, consistently delivering high-quality outcomes within tight timelines. Successfully completed over 1000 hours in the Coding Dojo Africa Bootcamp, specializing in JavaScript, Python, React, Angular, and Java, thereby achieving mastery in diverse facets of web development.

Now eager to embark on a professional journey, driven by the motivation to enhance both personal and technical expertise.

### PROJECTS

#### FamiliaCare (Angular/Java)

Web developer and Scrum Master/Team project/20 days

##### Introduction:

I designed a website for a company specializing in in-home caregiver services for the elderly. This service offers reassurance to busy adults, ensuring that their parents receive attentive care and remain safe in the familiar environment of their homes.

##### Technologies Used:

I developed the backend using Java Spring Boot and created the Front-End using Angular, Bootstrap, JavaScript, and CSS. The project incorporates a MySQL database. Additionally, I utilized tools such as Balsamiq for wireframing, GitHub for version control, Canva for design elements, and Trello for project management.

#### FeedHope (React Project)

Web developer and Scrum Master/Team project/ 11days

##### Introduction:

I developed a website that serves as a bridge between hotels, restaurants, and businesses with surplus food and local food banks. This platform facilitates seamless connections between food donors and food banks, streamlining the process for individuals in need to access donated food effectively.

##### Technologies Used:

For the React-based front end, I utilized Bootstrap and CSS.

In terms of the React-powered backend, I employed Node.js Express to develop the necessary functionalities. The comprehensive technology stack includes React, Node.js, Mongoose, MongoDB, JavaScript, Bootstrap, Stripe for payments, Axios for HTTP requests, and various tools like Balsamiq for wireframing, GitHub for version control, and Canva for design elements.

### Pandalab (Python Project)

Web developer and Scrum Master/ Team project / 8days

#### Introduction:

Our website facilitates easy scheduling of medical sample collection appointments, access to detailed analysis information, and convenient downloading of test results.

#### Technologies Used:

To style the wireframes, I utilized Bootstrap and CSS. For the frontend with Python, I integrated Flask and JavaScript to enhance the user experience. The backend is powered by Flask, Python, and JavaScript. The technology stack also includes MySQL for data management. Additionally, tools like Balsamiq, Trello for project management, GitHub for version control and Canva for design elements contribute to a comprehensive development process.

## EDUCATION

09/2013 – 06/2016	<b>licence in Biotechnologies</b> <b>Higher Institute of Applied Biological Sciences of Tunis</b>	Tunis, Tunisia
-------------------	--	----------------

## CERTIFICATES

### Software Development Coding Dojo Africa

April 2023 – September 2023 | Ariana, Tunisia

American Certification in Full-Stack Web Development

- 1200+ hours of coding in JavaScript, Python, and Java including 3 projects.
- Pair Programming and work on algorithms daily.
- Soft Skills training to enhance communication and team collaboration.

## PROFESSIONAL EXPERIENCE

10/2021 – 09/2022	<b>Laboratory Technician</b> <b>Biologiste Mme.Sirine Guebsi Jeribi</b>	Aouina, Tunisia
03/2020 – 06/2020	<b>Medical Secretary</b> <b>Dr. Ilhem Safra Ftouhi</b>	Aouina, Tunisia
09/2016 – 08/2019	<b>Laboratory Technician</b> <b>Biologiste Mme Montaha Ben Jemaa</b>	Ariana, Tunisia

## TECHNICAL SKILLS

- |   |  |   |
|---|--|---|
| • Front-End: HTML, CSS, Bootstrap, JavaScript, React, Angular, TailWind | • Back-End: Python, MySQL, NodeJs Express, MongoDB, Mongoose, JAVA Spring Boot | • Others: Trello, Balsamiq, Stripe, Canva, GitHub |
